

JST Information Services

Let's discover what you want to know

Explore Japan's academic journals

✉ contact@jstage.jst.go.jp

<https://www.jstage.jst.go.jp/browse/-char/en>

J-STAGE is an online journal platform providing easy access to a wide variety of full-text academic articles. Over 2,300 of Japan's academic societies use J-STAGE to publish their journals.

Diverse content

- Publications on J-STAGE covers a wide variety of academic fields.

Databases linked to J-STAGE

- J-STAGE journals are listed in: CiNii, DOAJ, Inspec, Scopus, PubMed.

My J-STAGE

- Free account service called "My J-STAGE" provides bookmark and alert function.

95%
of articles are
free access

426.3 million
articles downloaded
annually
(As of March, 2024)

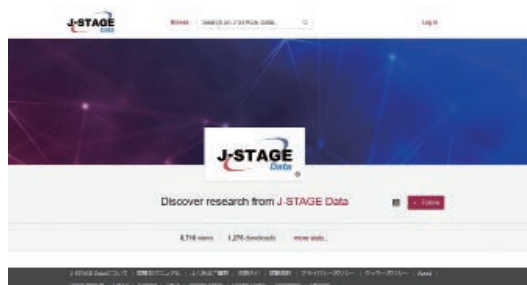

Open access to research data

✉ data-contact@jstage.jst.go.jp

<https://jstagedata.jst.go.jp/>

J-STAGE Data is a data repository that lists and publishes data related to articles on J-STAGE, creating new value by sharing and reusing data following the global trend towards open science.

92 journals
have applied

733 data
are available

(As of March, 2024)

Data can now be viewed, cited, and reused independently of the paper

- Data is automatically assigned a DOI and distributed worldwide as open access data.
- Data can be reproduced, shared, and reused under the conditions specified by the copyright holder.
- Easier to view, find, cite, and use data.

Share your research results more quickly
with Jxiv preprints

Jxiv

✉ preprint@jst.go.jp

https://jxiv.jst.go.jp/index.php/jxiv/user/setLocale/en_US

Jxiv is the preprint server in Japan, offering researchers the opportunity to make their pre-reviewed papers widely available through open access. Preprints speed up the cycle of feedback, with benefits for both the researcher and the scientific community.

Jxiv

[Archives](#) [Areas of Knowledge](#) [Terms of Service](#) [Submission Guidelines](#) [Manuals](#) [About](#) [Announcements](#)

Submission

- All research fields, Japanese or English Preprints.
- Submitter must have a researchmap or ORCID account.

Browsing

- You can view all preprints for free.

Comprehensive gateway linking multiple
scientific and technological databases

つながる ひろがる ひらめく
J-GLOBAL
科学技術総合リンクセンター

✉ helpdesk@jst.go.jp

<https://jglobal.jst.go.jp/en>

J-GLOBAL is a service based on the concept of “Linking, Expanding, and Sparking.” It links science and technology information, which hitherto stood alone, to support the next generation of ideas. By linking the information entered in the system, we provide opportunities to obtain knowledge and make unexpected discoveries from high-quality S&T information sources within and outside JST.

Helping you to find:

- Clues or hints for solving technical issues.
- Eligible researchers for joint research.
- Research with commercial potential at a certain university.

Researchers
360,000

Articles
66.26 mil.

Patents
15.54 mil.

(As of March, 2024)

Japan's largest scientific, technological,
and medical database

✉ gsh-jd-help@cs.jp.fujitsu.com

<https://jdream3.com/>

JDream III is a comprehensive scientific, technological, and medical bibliographic database containing about 95 million records from sources in Japan and worldwide, including journals, proceedings, and technical papers. JDream III is provided by G-search. The database records are abstracted and indexed in Japanese with original thesaurus support. JDream III provides an exhaustive record of research output in Japan.

Find best research partners

✉ gsh-jd-help@cs.jp.fujitsu.com

https://jdream3.com/lp/expert_finder/

JDream Expert Finder is a service that enables you to search for the best research partners and key opinion leaders to solve your research problems. JDream Expert Finder is provided by G-search. It contains information on about 1.85 million researchers, and has analyzed and extracted more than 51 million pieces of JDream III literature information based on the theory of complex networks.

AI-based medical and pharmaceutical
literature search service

✉ gsh-jd-help@cs.jp.fujitsu.com

<https://solution-info.g-search.jp/sr/sr-solution>

JDream SR is a service that uses AI to analyze domestic and overseas medical and pharmaceutical literature to discover the relationships between gene mutations, drugs, diseases, outcome indicators, etc., required for genomic medicine and health technology assessment (HTA). It efficiently extracts the information that doctors and evaluators need. JDream SR is provided by G-search.

Visualize data from papers, patents
and news to inspire innovations

✉ gsh-jd-help@cs.jp.fujitsu.com

<https://ia.jdream3.com/>

JDream Innovation Assist analyzes and visualizes data from journals, patents and news articles in 21 types of graph that can be used to identify technology trends and topics in specific fields. It provides new insights for innovations through graphical representation and a simple, user-friendly interface. JDream Innovation Assist is provided by G-search.

Database of information on
researchers in Japan

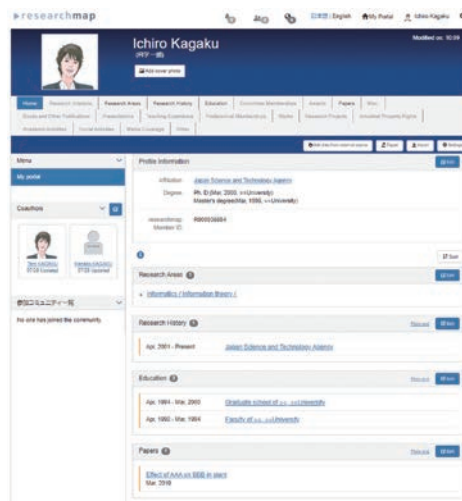

► researchmap

researchmap

✉ <https://researchmap.jp/public/inquiry/>

<https://researchmap.jp/?lang=en>

researchmap is a platform for managing, publishing, and sharing information on researchers in Japan. About 360,000 researchers have registered their profiles and research outputs on researchmap. researchmap has been integrated into the systems of universities and provides features to help users find researchers for industry-academia collaboration and joint research.

Make research activities management easier

- Research achievements can be imported from external literature databases, and AI manages information for you.

Career support portal site
for researchers and research staff

JREC-IN Portal
for all researchers and research staff

JREC-IN Portal

✉ jrecinportal@jst.go.jp

<https://jrecin.jst.go.jp/seek/SeekTop?ln=1>

“JREC-IN Portal” is an informative portal site that supports the career development and skill-building of researchers, research assistants, technicians, and other research-related human resources. It lists 26,000 public job openings per year.

High-quality services available for free

- Browsing
- Membership registration
- Job posting
- Personal information registration and update
- Job alerts

Exclusive services for recruiting members

- Post job information:
Information on job openings is sent to job-seeking members as matching e-mails
- Seek researchers' information to find highly qualified candidates
- Send inquiry e-mails:
Inquiries can be sent to job-seeking members

Registration of permanent identifier DOI (Digital Object Identifier)

✉ info@japanlinkcenter.org

<https://japanlinkcenter.org/top/english.html>

The Japan Link Center (JaLC) * is the Registration Agency in Japan approved by the DOI Foundation. JaLC registers DOIs for Japanese academic contents such as academic journal articles, books, research data, e-learning etc.

* It is administered jointly by Japan Science and Technology Agency, National Institute for Materials Science, National Institute of Informatics, and National Diet Library.

DOIs
12 million

over

Regular Members
76 institutions

Associate Members
3,160 institutions

over

(As of March, 2024)

Providing global access to Japanese digital research contents

- Ensuring sustained access to contents by registering DOI
- JaLC members can register DOI
- Collaboration with Crossref, DataCite and ORCID

Database of JST research and development programs

✉ projectdb_contact@jst.go.jp

<https://projectdb.jst.go.jp/>

This website is a public database of JST research and development programs. It contains outlines of over 26,900 research projects and related information, such as titles, researchers, affiliations, research periods, research areas, etc. This database provides sequential information for data which has already been consolidated. In addition, we provide data in response to requests from users such as those conducting data analysis for R&D management.

Integrated retrieval system for information on national scientific research projects

✉ grants-contact@jst.go.jp

<https://grants.jst.go.jp>

GRANTS is a service that allows you to search for information on national scientific research projects in an integrated way. This system includes information on over 26,900 projects from JST Project Database and over 1.04 million projects from Database of Grants-in-aid for Scientific Research (KAKEN). In the future, we plan to gradually expand the number of participating funding institutions and the scope of search results. This will hopefully contribute to seed searches by industry and information collection from research institutions and researchers, promoting greater connections with relevant parties.

Toward innovation through
database integration

NBDC

✉ https://form2.jst.go.jp/s/contact_nbdc

<https://biosciencedbc.jp/en/>

The Office of NBDC Program promotes the creation of knowledge and innovation by making research data shared extensively, connected, and easy to use. We provide fundamental web services, implement research funding program for databases (DICP), and develop technologies for integrative use of data.

Highly accurate machine translation system
for Chinese science and technology literature

日中・中日 機械翻訳

✉ webmt@jst.go.jp

<https://webmt.jst.go.jp/>

Highly accurate neural machine translation system developed by JST and Kyoto University is now available online. By deep learning with over 5 million bilingual corpora, the system enables users to translate science & technology and patent literature, from Chinese to Japanese and vice versa with high accuracy.

Cross-search JST information services

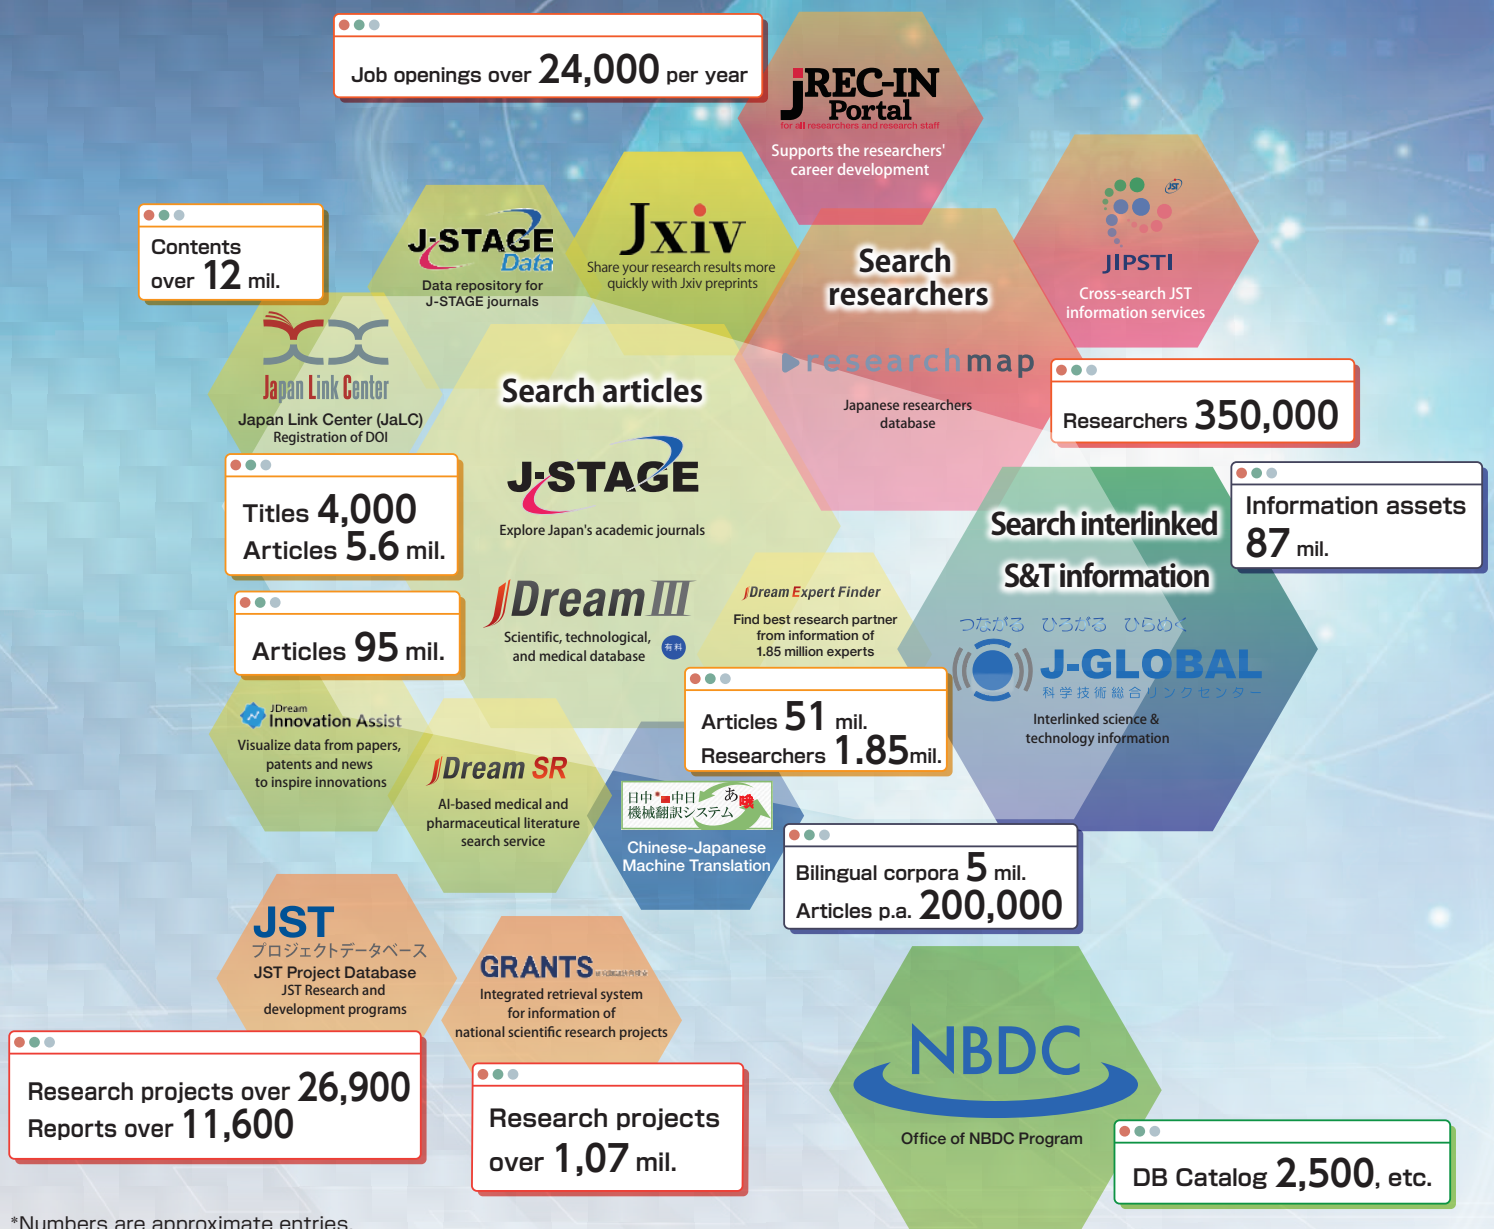

JIPSTI

✉ jipsti@jst.go.jp

<https://jipsti.jst.go.jp/>

JIPSTI, Japan Information Platform for S&T Innovation, is a portal site for providing information about JST's information services including Jxiv, J-STAGE, J-GLOBAL, JaLC, researchmap, JREC-IN Portal, and NBDC.
